

Tiny, hidden crystals ...Go for UVs !

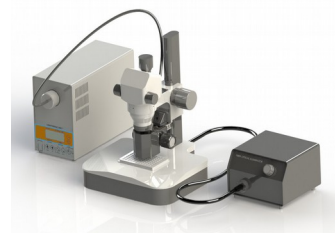

The MiVU™

The MiVU™ is a **powerful UV light**, with optimized filters, designed to be used on a classical **binocular microscope**.

NatX-ray's Exclusive feature:

When delivered with NatX-ray's binocular, the MiVU™ includes

- a **shielding to protect users** from UV exposure
- **full synchronization** with the digital camera to minimize sample exposure

Special offer !!

Until 15th Dec: Order the UV light, and get 25% off on the microscope with digital camera

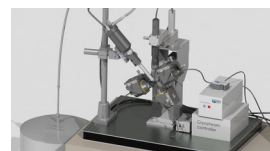

The UV Bench

A benchtop fully **automated system** for screening and image analysis with UV and visible light.

- Equipped with a UV optimized optics, to minimize exposure
- An optimal – **cost effective** – design

Special offer !!

Until 15th Dec: Order the UV Bench, and get a Binocular microscope with LED light for free !

NatX-ray's other current exclusive offers include:

The **Opticrys™**: an exclusive solution for a rational approach to crystal growth.

The **MisC™**: a Micro-Spectrophotometer for Crystals, for UV/Visible absorption and fluorescence measurements.
